

余昌峰(Chang-Feng Yu) 發表論文清單(95.8-98.12)

一、第1作者或通訊作者

1. **Chang-Feng Yu***, C.-W. Sung, S.-H. Chen, S.-J. Sun, “Relationship between the photoluminescence and conductivity of undoped ZnO thin films grown with various oxygen pressures”, *Applied Surface Science*, **256**, p792-796 (2009). (IF=1.576)
2. **Chang-Feng Yu***, Sy-Hann Chen, Shih-Jye Sun and Hsiung Chou, “ Influence of the substrate temperature on the electrical and magnetic properties of ZnO:N thin films grown by pulse laser deposition ”, *J. Phys. D: Appl. Phys.*, **42** , p035001-035004 (2009). (IF=2.104)
3. **Chang-Feng Yu***, Tzu-Jen Lin, Shih-Jye Sun and Hsiung Chou, “ Origin of Ferromagnetism in nitrogen embedded ZnO:N thin films”, *J. Phys. D: Appl. Phys.*, **40**, p6497–6500 (2007). (IF=2.104).
4. **Chang-Feng Yu**, Sy-Hann Chen*, Wen-Jia Xie, Yung-Shao Lin, Cheng-Yu Shen, Sheng-Jhong Tsai, Che-Wei Sung, Chyung Ay, “ Nanoscale surface electrical properties of zinc oxide films investigated by conducting atomic force microscopy ”, *MICROSCOPY RESEARCH AND TECHNIQUE*, **71**, p1-4 (2007). (IF=1.883)

二、共同作者

1. Sy-Hann Chen *, **Chang-Feng Yu**, “Differences between nanoscale structural and electrical properties of AZO:N and AZO used in polymer light-emitting diodes”, *Microscopy Research and Technique*, in press (2009) . (IF=1.883)
2. Sy-Hann Chen *, **Chang-Feng Yu**, “Effect of substrate temperature on the nanoscale surface structural and electrical properties of ZnO:N films prepared by pulsed laser deposition”, *J. Vac. Sci. Technol. B*, **24**, p 1933-1937 (2009). (IF=1.445)
3. Sy-Hann Chen*, **Chang-Feng Yu**, Yung-Shao Lin, Wen-Jia Xie, Ting-Wei Hsu, and Din Ping Tsai, “ Nanoscale surface electrical properties of AZO thin films investigated by scanning probe microscopy ”, *J. Appl. Phys.*, **104**, p114314-6 (2008). (IF=2.201)
4. K. Y. Lo*, Shih-Chieh Lo, **Chang-Feng Yu**, Jung-Y Huang, Yi-Jen Huang, Ren-Chuan Chang and Sheng-Yuan Chu, “ Optical second harmonic generation from the twin boundary of ZnO thin films grown on Silicon ”, *Applied Physics Letters*, **92**, p091909-1-4 (2008). (IF= 3.726)
5. Kuang-Yao Loa, Shih-Chieh Loa, Sheng-Yuan Chub, Ren-Chuan Changb, **Chang-Feng Yu**, “ Analysis of the Growth of RF Sputtered ZnO Thin Films using the Optical Reflective Second Harmonic Generation ”, *Journal of Crystal Growth*, **290**, p532-538 (2006). (IF=1.757)

三、中文期刊

10. **余昌峰***, 許廷維, 余諮宜, "Electrical Characterization of ZnO/Si Heterojunctions Grown by Pulsed Laser Deposition", 奈米通訊, 第十五卷 (民國九十七年十二月), 第四期, p28-32 (2008). [ISSN 1029-502X]
11. **余昌峰***, 宋哲瑋, "製程溫度對脈衝雷射蒸鍍法製備之氧化鋅導電薄膜的特性影響", 國立虎尾科技大學學報, 第二十七卷第四期 (民國九十七年十二月) p19-28 (2008). [ISSN 1993-7571]

四、研討會

1. 余昌峰*, 陳思翰, 林子荏, 許廷緯, 林亞男, 陳世銘, 許銘泰, 宋哲瑋, "不同基板溫度下之氧化鋅導電薄膜研究", 中國材料科學學會2007年年會.
2. 余昌峰*, 陳思翰, 許廷維, 林子荏, 陳世銘, 林亞男, 林勇孝, 許銘泰, "可撓式AZO透明導電薄膜研", 中國材料科學學會2007年年會.
3. 林勇孝、許廷維、余昌峰、*陳思翰, "利用導電性原子力顯微技術研究AZO之微觀表面電性", 中國材料科學學會2007年年會.
4. 余昌峰(C. F. Yu), "The Study of High Speed Ring Oscillator with Dual Delay Path", Proceedings of the 2005 Workshop on Consumer Electronics and Signal Processing (WCEsp 2005) Proceedings of the 2005 Workshop on Consumer Electronics and Signal Processing (WCEsp 2005)
5. 余昌峰, 嘉義大學應用物理系, "一個低電壓、低消耗功率互補式金氧半兩級式運算放大器", 2004 通信電子科技與應用研討會(CECA2004), 第 110 頁.
6. 余昌峰, "900MHz 之CMOS 鎖相迴路的設計與製作", 2004 通信電子科技與應用研討會(CECA2004), 第 82 頁.
7. 陳耀鵬(Y. P. Chen), 余昌峰(C. F. Yu), 張原豪(Y. H. Chang), 馬郁華(Y. H. Ma), 吳宗霖(C. L. Wu), 陳子凡(T. F. Chen), 吳偉杰(W. G. Wu), "角度編碼器位置及轉速四倍解析IC 設計", p.106, 2003 Conference on Information Technology and Applications in Outlying Islands (ITAOI2003) 第三屆離島資訊技術與應用研討會
8. 馬郁華(Y.H. Ma), 余昌峰(C.F. Yu), 張原豪(Y.H. Chang), 陳耀鵬(Y.P. Chen), 林弘益(H.Y. Lin), 簡楷桐(K.T. Jian), 林墩堰(D.Y. Lin), "D 型正反器之數位濾波器的設計與模擬", p.101, 2003 Conference on Information Technology and Applications in Outlying Islands (ITAOI2003) 第三屆離島資訊技術與應用研討會
9. J.T. Chen, J.P. Chu, I.J. Hsieh, M.S. Feng, P. Lin and C.F. Yu, "Characterizations of Magnesium Tungstate Thin Films Phosphors by R.F. Magnetron Sputter Deposition," Proc. of the 1995 Annval Conf. of the Chinese Soc. for Mat. Sci.
10. Chang-Feng Yu, " Electroluminescent Device with ZnGa₂O₄ Phosphors", 1999 EDMS, p173-175
